investigative ophthalmology

A Journal of Clinical and Basic Research

EDITOR

Herbert E. Kaufman, M.D.
Professor of Ophthalmology and Pharmacology
College of Medicine
University of Florida
Gainesville, Florida

MANAGING EDITOR

Maija H. Uotila
University of Florida
Gainesville, Florida

EDITORIAL BOARD

J. STEVENS ANDREWS
Nashville, Tennessee

G. WINSTON BARBER
Philadelphia, Pennsylvania

DWIGHT A. BURKHARDT
Minneapolis, Minnesota

CHANDLER R. DAWSON
San Francisco, California

WILLIAM W. DAWSON
Gainesville, Florida

LYNETTE FEENEY
Portland, Oregon

SIDNEY FUTTERMAN
Seattle, Washington

MORTON GOLDBERG
Chicago, Illinois

PETER GOURAS
Bethesda, Maryland

DAN B. JONES
Houston, Texas

CARL KUPFER
Bethesda, Maryland

ALAN M. LATIES
Philadelphia, Pennsylvania

IRVING H. LEOPOLD
New York, New York

A. EDWARD MAUMENEE
Baltimore, Maryland

WILLIAM H. MILLER
New Haven, Connecticut

STEVEN M. PODOS
St. Louis, Missouri

FRANK M. POLACK
Gainesville, Florida

DAVID A. ROBINSON
Baltimore, Maryland

MELVIN L. RUBIN
Gainesville, Florida

ALAN B. SCOTT
San Francisco, California

MARVIN L. SEARS
New Haven, Connecticut

GERALD WESTHEIMER
Berkeley, California

Subject index*

A

Acetylcholine, choline acetylase, and acetylcholinesterase, quantitative determination of, in the developing rabbit cornea, 418

Acetylcholinesterase, acetylcholine, and choline acetylase, quantitative determination of, in the developing rabbit cornea, 418

Ach+eserine, induction of aqueous humor formation by use of, 910

Adenovirus, human, retinoblastoma-like tumors induced in rats by, 853

type 12, human, in hamsters, extraocular orbital tumors induced by, 185

Adrenocorticoids, oral, ERG in human eyes following, 777

Afferent arc of the corneal immunologic reaction, migration inhibitory factor, 152

Agranulocytosis, infantile, genetic, optic neuropathy, and chloramphenicol, 534

Allografts, corneal, rabbit, immunologic protection of, preparation and in vitro testing of heterologous blocking antibody, 646

Amblyopes, visually evoked cortical responses of, to a spatially alternating stimulus, 936

Amblyopia, experimental, histological studies of visual system in monkeys with, 727

in monkeys, further behavioral observations and clinical correlations, 721

Amblyopic subject, lateral inhibition and the VER in the central field of an, 154

Amino acid content and uptake of $^{14}C\alpha$-AIB in cataractous and clearing lenses, reversal of triparanol-induced cataracts in rat, 386

free, in normal and biologically fractionated retinas, absolute levels of some, 686

Angiography, fluorescein, and ocular hemodynamics, effect of ocular pigments on choroidal fluorescence during induced ocular hypertension, 896

of separate retinal and choroidal circulations, clinical technique and apparatus for simultaneous, 248

sodium fluorescein dye, of eye, injection technique for indocyanine green and, 881

Announcements, 84, 236, 314, 631, 716, 789, 870, 943

Anterior chamber mixing, leakproof needle useful for, or for multiple injections in acute experiments, 464

Antibody, heterologous blocking, immunologic protection of rabbit corneal allografts, preparation and in vitro testing of, 646

Antigens, lymphocyte, human, sensitization to, by corneal transplantation, 639

Antiproteases, serum, α_1-antitrypsin, corneal ulceration and, 759

α_1-Antitrypsin, corneal ulceration and serum antiproteases, 759

Apathy and the National Eye Institute, 871

Aqueous humor after paracentesis and its prevention by aspirin, release of PGE_2-like activity into, 939

dynamics in man, studies of, measurements in young normal subjects using norepinephrine and isoproterenol, 267

formation by use of Ach+eserine, induction of, 910

prostaglandin E, indomethacin blocks arachidonic acid-associated elevation of, 621

Arachidonic acid-associated elevation of aqueous humor prostaglandin E, indomethacin blocks, 621

Argon laser photocoagulation of ciliary processes and pigmented pupillary membrane in man, 622

Arterial P_{CO_2}, effect of, on relative retinal blood flow in monkeys, 335

on inner-retinal oxygen availability in monkeys, effects of, 449

consumption rate in monkeys, effect of, 456

Aspirin, release of PGE_2-like activity into aqueous humor after paracentesis and its prevention by, 939

Association for Research in Vision and Ophthalmology, Fall meeting, 632

Financial statement, 315

glaucoma and, 717

new dimension, 792

placement service, 791

Atropinic drugs, eye closure and effect of, 542

Autoradiography of ^3H-fucose incorporation, synthesis of interphotoreceptor matrix, 739

Axonal transport in ganglion cells of rabbit retina, effects of vinblastine on microtubule structure and, 579

Axons, retinal ganglion cell, response of, to lesions in adult mouse retina, 382

B

Blood flow, intraocular, control of, intraocular pressure, 327

relative retinal, in monkeys, effect of arterial P_{CO_2} on, 335

retinal barrier as choroidal level of optic nerve canal, is there a potential defect in, 513

vessels to disc tissue, transfer of fluorescein from, theory, 475

Bovine alpha crystallin, effect of calcium upon reaggregation of, 225

cornea, soluble proteins of, 114

iris sphincter strips, relative potency of cholinomimetic drugs on, 80

*January, pp. 1-84; February, pp. 85-160; March, pp. 161-236; April, pp. 237-316; May, pp. 317-390; June, pp. 391-470; July, pp. 471-548; August, pp. 549-632; September, pp. 633-716; October, pp. 717-790; November, pp. 791-870; December, pp. 871-962.

Bovine—Cont'd
lenses, anteroposterior cation gradients in, 861
Brain behind the eye, is the, implications of processing by the retina, 398
potentials, evoked, rapid objective refraction using, 669
stem stimulation in the alert monkey, saccadic inhibition induced by, 77
Bugs, fungal, new drugs for, 551
Buphthalmos, induction of, in chicks fed an excess of glycine, 348

C

$^{14}C\alpha$-AIB, uptake of, in cataractous and clearing lenses, reversal of triparanol-induced cataracts in rat, amino acid content and, 386
Calcium, effect of, upon reaggregation of bovine alpha crystallin, 225
Camera, fundus, comparison of various photographic films, resolution at low contrast with, 865
Canal, optic nerve, is there a potential defect in blood-retinal barrier at choroidal level of, 513
Cat, cone and rod responses in nutritionally induced retinal degeneration in, 694
Cataract, experimental, and wound healing in mouse lens, 156
reversal of triparanol-induced, in rat, amino acid content and uptake of $^{14}C\alpha$-AIB in cataractous and clearing lenses, 386
simulated, degradation of vision through a, 213
sweet and sour, 872
Cation composition of intracellular fluid, studies on crystalline lens, influence of sodium substitutes on, 485
gradients, anteroposterior, in bovine lenses, 861
Cell cultures, corneal, with immunoperoxidase, light and electron microscopic study, identification of herpes simplex and vaccinia viruses in, 839
Cell—Cont'd
indoleamine-containing, in chick retina, 537
mast, choroidal, rabbit, density gradient of, 711
Chambers, anterior, rabbits, effects of corneal environment on oxygen tension in, 140
Channels, feature-detecting, visual neurophysiology, 2
Chicks, induction of buphthalmos in, fed an excess of glycine, 348
retina, indoleamine-containing cell in, 537
Chievitz, retinal transient layer of, fine structure of, 504
Chloramphenicol, optic neuropathy, and infantile genetic agranulocytosis, 534
Chloride transport by epinephrine and Db-cyclic-AMP in the cornea of the rabbit, activation of, 127
Choline acetylase, acetylcholine, and acetylcholinesterase, quantitative determination of, in the developing rabbit cornea, 418
Cholinomimetic drugs, relative potency of, on the bovine iris sphincter strips, 80
Choroid: a model for study of cytologic behavior of RPE in vitro, organ culture of human retinal pigment epithelium and, 554
coagulative necrosis in malignant melanoma of, at macula with extensive subretinal hemorrhage, 525
Choroidal fluorescence during induced ocular hypertension, fluorescein angiography and ocular hemodynamics, effect of ocular pigments on, 896
mast cells, rabbit, density gradient of, 711
Ciliary epithelium, electron microscopic observation of gap at junction of, with retina in human eye, 623
permeability properties of, in response to prostaglandins, 752
Ciliary—Cont'd
processes and pigmented pupillary membrane in man, argon laser photocoagulation of, 622
primate, and pars plana, electron microscopic localization of occluding junctions in, 863
Circulations, retinal and choroidal, clinical technique and apparatus for simultaneous angiography of separate, 248
Collagenase, fibroblast, partial purification and characterization, 771
inhibitors, corneal toxicity of, 779
Complexes, intracellular junctional, retinal pigment epithelia, 354
Cone and rod responses in nutritionally induced retinal degeneration in cat, 694
Congenital disc blurring and incipient papilledema in red-free light—a photographic study, comparison of, 241
Conjunctiva, chronic cicatrizing conjunctivitis, and benign mucous membrane pemphigoid, essential shrinkage of, 308
Conjunctivitis, chronic cicatrizing, conjunctiva, and benign mucous membrane pemphigoid, essential shrinkage of, 308
Contact lens, wide-angle, fundus holography through a, 786
Cornea, bovine, soluble proteins of, 114
organ-cultured, an in vivo study, 176
rabbit, activation of chloride transport by epinephrine and Db cyclic-AMP in, 127
developing, quantitative determination of choline acetylase, acetylcholine, and acetylcholinesterase in, 418
vaccinia-infected, a transmission electron microscopic study, 782

Cornea—Cont'd
reversibility of the effects of in vitro perfusion of the rabbit corneal endothelium with calcium-free medium, studies on, 98
task force, summary report of the, National Eye Institute, 391
Corneal allografts, rabbit, immunologic protection of, preparation and in vitro testing of heterologous blocking antibody, 646
cell cultures with immunoperoxidase light and electron microscopic study, identification of herpes simplex and vaccinia viruses in, 839
endothelium and Descemet's membrane, macular corneal dystrophy, ultrastructural pathology of, 88
functional and structural changes in the, during in vitro perfusion, 410
epithelium, normal surface of, a scanning electron microscopic study, 654
toxicity of collagenase inhibitors, 779
transplantation, sensitization to human lymphocyte antigens by, 639
ulceration and serum antiproteases, α_1-antitrypsin, 759
Cortical responses of amblyopes, visually evoked, to a spatially alternating stimulus, 936
Corticosteroids, topical, effect of, on susceptibility of immune animals to reinoculation with herpes simplex, 181
Crystallin, bovine alpha, effect of calcium upon reaggregation of, 225
Crystalline lens, studies on, influence of sodium substitutes on cation composition of intracellular fluid, 485
Cultures, corneal cell, with immunoperoxidase, light and electron microscopic study, identification of herpes simplex and vaccinia viruses in, 839
Cyanate effects on lens in vitro, 544

D

Damage, photic, to the retina, experimental and therapeutic aspects of, 35
Density gradient of rabbit choroidal mast cells, 711
Descemet's membrane, macular corneal dystrophy, ultrastructural pathology of corneal endothelium and, 88
Detachment, retinal, realignment of photoreceptors disturbed in orientation secondary to, 849
Diphenylhydantoin, effect of, on electroretinogram of rabbits, II. Effects of hypoxia and potassium, 573
on electroretinogram of rabbits, effect of, I. Effect of concentration, 567
Directionality and waveguide properties of optically isolated rat rods, 873
Disc blurring, congenital, and incipient papilledema in red-free lights—a photographic study, comparison of, 241
tissue, transfer of fluorescein from blood vessels to, theory, 475
Disparity processing, stereo field map with implications for, 904
Diurnal curve in man: new observations, 705
Drugs, atropinic, eye closure and effect of, 542
for fungal bugs, new, 551
structural factors influencing outflow facility and its changeability under, 280
Dystrophic extraocular muscle fibers, light and electron microscopic study in serial sections of, 917
Dystrophy, macular corneal, ultrastructural pathology of corneal endothelium and Descemet's membrane, 88

E

Editor, letter to the, 470, 629, 714
letter to, answer, 629
Editorial, 1, 472, 474, 791, 792
Electromyographic study of an unusual case, V pattern exotropia, 232
Electron microscopic study, normal surface of corneal epithelium, 654
of the development of retinal Mullerian cells, 295
transmission, vaccinia-infected rabbit cornea, 782
Electrooculogram in a patient with a typical vitelliform macular lesion, normal, 830
Electroretinogram of rabbits, effect of diphenylhydantoin on, I. Effect of concentration, 567
II. Effects of hypoxia and potassium, 573
Emulsification, phaco, trials and tribulations, 318
Endothelium, corneal, and Descemet's membrane, macular corneal dystrophy, ultrastructural pathology of, 88
functional and structural changes in the, during in vitro perfusion, 410
rabbit, with calcium-free medium, studies on the cornea, reversibility of the effects of in vitro perfusion of, 98
Epidemiology, foveomacular retinitis, and important problem in military medicine, 5
Epinephrine and Db cyclic-AMP in the cornea of the rabbit, activation of chloride transport by, 127
Epithelia, retinal pigment, intracellular junctional complexes of, 354
Epithelium, ciliary, electron microscopic observation of gap at junction of, with retina in human eye, 623
permeability properties of, in response to prostaglandins, 752
corneal, normal surface of, a scanning electron microscopic study, 654
pigment; a key to retinal disease, phagolysosomal system of, 635
retinal pigment, human, and choroid: a model for the study of cytologic behavior of RPE in vitro, organ culture of, 554

Epithelium, retinal pigment, human—Cont'd
tissue culture of, 52
ERG in human eyes following oral adrenocorticoids, 777
Excitation, visual, 239
Exotropia, V pattern, electromyographic study of an unusual case, 232
Extraocular muscle fibers, dystrophic, light and electron microscopic study in serial sections of, 917
pharmacologic weakening of, 924
orbital tumors, induced by human adenovirus type 12 in hamsters, 185
Eye closure and effect of atropinic drugs, 542
Eye disease, clinical experiments in cellular immunity in, 520
wall resection, full-thickness, evaluation of preoperative photocoagulation, 262

F

Fibers, muscle, extraocular, dystrophic, light and electron microscopic study in serial sections of, 917
Fibroblast collagenase partial purification and characterization, 771
Films, photographic, resolution at low contrast with fundus camera, comparison of various, 865
Filtration coefficient of intraocular vasculature as measured by low-pressure perfusion in primate eye, 321
Fish detect polarized light, how, 78
Flavin isomerization catalyst, reduced, in regeneration of bleached rhodopsin, evidence for the involvement of, 234
Fluid, intracellular, studies on crystalline lens, influence of sodium substitutes on cation composition of, 485
Fluorescein angiography and ocular hemodynamics, effect of ocular pigments on choroidal fluorescence during induced ocular hypertension, 896
Fluorescein—Cont'd
dilution curves in human retinal vessels, fluorophotometric recording of, 310
from blood vessels to disc tissue, transfer of, theory, 475
Fluorophotometric recording of fluorescein dilution curves in human retinal vessels, 310
Fourier analysis of vision, 86
Foveomacular retinitis, an important problem in military medicine, epidemiology, 5
Fundoscopy of nerve fiber layer defects in glaucoma, 814
Fundus camera, comparison of various photographic films, resolution at low contrast with, 865
holography through a wide-angle contact lens, 786
photography, unsharp masking in, 461

G

Galactitol accumulation and irreversible lens opacities in galactosemic rats, 82
Ganglion cell axons, retinal, response of, to lesions in adult mouse retina, 382
of rabbit retina after intravitreous injection of vinblastine, protein synthesis in, 467
effects of vinblastine on microtubule structure and axonal transport in, 579
Gels designed for vitreous implantations, optical properties of, 465
Glaucoma, 3
Glaucoma and ARVO, 717
fundoscopy of nerve fiber layer defects in, 814
primary open-angle, increased sensitivity to theophylline associated with, 603
pupillary block, suggested anatomic classification to define, 540
Glutathione, reversal of triparanol-induced cataract in rat, reduced sulfhydryl groups in soluble protein and, 389
Glycine, induction of buphthalmos in chicks fed an excess of, 348
Gradients, vascular perfusion pressure, in eye, 198

H

^{3}H-fucose incorporation, autoradiography of, synthesis of interphotoreceptor matrix, 739
Hamsters, extraocular orbital tumors induced by human adenovirus type 12 in, 185
Hemodynamics, ocular, effect of ocular pigments on choroidal fluorescence during induced ocular hypertension, fluorescein angiography and, 896
Hemorrhage, extensive subretinal, coagulative necrosis in malignant melanoma of choroid at macula with, 525
Herpes simplex and vaccinia viruses in corneal cell cultures with immunoperoxidase, a light and electron microscopic study, identification of, 839
reinoculation with, effect of topical corticosteroids on the susceptibility of immune animals to, 181
Herpetic keratitis in rabbits and monkeys, effects of exogenous interferon on, 378
Holography, fundus, through a wide-angle contact lens, 786
Humor, aqueous, prostaglandin E, indomethacin blocks arachidonic acid-associated elevation of, 621
Hydrolysis, pilocarpine; clinical significance, 931
6-Hydroxydopamine, hypochromia of rabbit iris induced by, 312
Hyperemia, ocular, mediated by prostaglandins, degeneration release of norepinephrine causes transient, 167
Hypersensitivity, cellular, in penetrating eye injuries, 380

Hypertension, ocular, fluorescein angiography and ocular hemodynamics, effect of ocular pigments on choroidal fluorescence during induced, 896
Hypochromia of the rabbit iris induced by 6-hydroxydopamine, 312

I

Immunoperoxidase, light and electron microscopic study, identification of herpes simplex and vaccinia viruses in corneal cell cultures with, 839
Implantation, vitreous, optical properties of gels designed for, 465
Indocyanine green and sodium fluorescein dye angiography of eye, injection technique for, 881
Indomethacin blocks arachidonic acid-associated elevation of aqueous humor prostaglandin E, 621
Infarction in sickling, macular ischemia and, 633
Inhibition, lateral, and the VER in the central field of an amblyopic subject, 154
Injuries, eye, penetrating, cellular hypersensitivity in, 380
Inner-retinal oxygen availability in monkeys, effects of arterial P_{CO_2} on, 449
consumption rate in monkeys, effect of arterial P_{CO_2} on, 456
Interferon, exogenous, effect of, on herpetic keratitis in rabbits and monkeys, 378
Intracellular fluid, studies on crystalline lens, influence of sodium substitutes on cation composition of, 485
junctional complexes of retinal pigment epithelia, 354
staining, 317
Intraocular blood flow, control of, effect of chemical sympathectomy, 848
intraocular pressure, 327
pressure, control of intraocular blood flow, 327
influence of position on, 204
prostaglandin synthesis, inhibition, and, 426
Intraocular—Cont'd
vasculature, filtration coefficient of, as measured by low-pressure perfusion in primate eye, 321
Interphotoreceptor matrix, synthesis of, autoradiography of ^{3}H-fucose incorporation, 739
Iris, bovine, sphincter strips, relative potency of cholinomimetic drugs on, 80
rabbit, hypochromia of, induced by 6-hydroxydopamine, 312
Iritis, herpetic, in rabbits and ocular penetration, trifluorothymidine treatment of, 532
Ischemia, macular, and infarction in sickling, 633
Isoproterenol and norephinephrine, studies of aqueous humor dynamics in man, measurements in young normal subjects using, 267

J

Junctions, occluding, in primate ciliary process and pars plana, electron microscopic localization of, 863

K

Keratitis, herpetic, in rabbits and monkeys, effect of exogenous interferon on, 378

L

Laser, argon, photocoagulation of ciliary processes and pigmented pupillary membrane in man, 622
trabeculotomy in monkeys, 707
Layer of Chievitz, retinal transient, fine structure of, 504
Lens, contact, wide-angle, fundus holography through a, 786
crystalline, studies on, influence of sodium substitutes on cation composition of intracellular fluid, 485
cyanate effects on, in vitro, 544
mouse, experimental cataract and wound healing in, 156
opacities, irreversible, in galactosemic rats, galactitol accumulation and, 82
Lenses, bovine, anteroposterior cation gradients in, 861
Lesions in adult mouse retina, response of retinal ganglion cell axons to, 382
vitelliform macular, typical, normal electrooculogram in patient with, 830
Light, low-intensity, effects of prolonged exposure of rabbit retina to, 45
polarized, how fish detect, 78
red-free, comparison of congenital disc blurring and incipient papilledema in—a photographic study, 241
Low-pressure perfusion in primate eye, filtration coefficient of intraocular vasculature as measured by, 321
Lymphocyte antigens, human, sensitization to, by corneal transplantation, 639
Lymphokines, induction of delayed-type sensitivity-like reactions in the eye by the injection of, 400

M

Macula with extensive subretinal hemorrhage, coagulative necrosis in malignant melanoma of, 525
Macular ischemia and infarction in sickling, 633
lesion, vitelliform, typical, normal electrooculogram in patient with, 830
Maculopathy, photic, in rhesus monkey, a light and electron microscopic study, 17
Mast cells, choroidal, rabbit, density gradient of, 711
Matrix, interphotoreceptor, synthesis of, autoradiography of ^{3}H-fucose incorporation, 739
Melanoma, malignant, of choroid at the macula with extensive subretinal hemorhage, coagulative necrosis in, 525
Membrane formation, vitreous, platelet-induced, 680
pupillary, pigmented, in man, argon laser photocoagulation of ciliary processes and, 622
Memoriam, in, Derrick T. Vail, 1898-1973, 548

Microtubule structure and axonal transport in ganglion cells of rabbit retina, effects of, 579
Migration inhibitory factor, afferent arc of the corneal immunologic reaction, 152
Monkey, alert, saccadic inhibition induced by brain-stem stimulation in, 77
cerebellectomized, oculomotor defects in, 618
effects of arterial P_{CO_2} on inner-retinal oxygen availability in, 449
relative retinal blood flow in, 335
consumption rate in, 456
experimental amblyopia in, further behavioral observations and clinical correlations, 721
laser trabeculotomy in, 707
rhesus, a light and electron microscopic study, photic maculopathy in, 17
with experimental amblyopia, histological studies of visual system in, 727
Mouse lens, experimental cataract and wound healing in, 156
retina, adult, response of retinal ganglion cell axons to lesions in, 382
Müller cells, retinal, comparative study of fine structure of, in various vertebrates, 434
Müllerian cells, retinal, electron microscopic study of the development of, 295
Muscle fibers, extraocular, dystrophic, light and electron microscopic study in serial sections of, 917
extraocular, pharmacologic weakening of, 924
internal eye, parasympathetic pathways to, 193

N

National Eye Institute, apathy and, 871
Necrosis, coagulative, in malignant melanoma of choroid at the macula with extensive subretinal hemorrhage, 525
Needle, leakproof, useful for anterior chamber mixing or for multiple injections in acute experiments, 464
Nerve fiber layer defects in glaucoma, fundoscopy of, 814
Neuropathy, optic, chloramphenicol, and infantile genetic agranulocytosis, 534
Neurophysiology, visual, feature-detecting channels, 2
Neuroretinal disease, congenital tritanopia without, 608
Niemann-Pick disease, Type A, ocular pathology of, a light and electron microscopic study, 366
Norephinephrine and isoproterenol, studies of aqueous humor dynamics in man, measurements in young normal subjects using, 267
degeneration release of, causes transient ocular hyperemia mediated by prostaglandins, 167
Nucleus suprachiasmaticus, enter, visual connection, 237

O

Ocular hemodynamics, effect of ocular pigments on choroidal fluorescence during induced ocular hypertension, fluorescein angiography and, 896
hypertension, fluorescein angiography and ocular hemodynamics, effect of ocular pigments on choroidal fluorescence during induced, 896
pathology of Type A Niemann-Pick disease, a light and electron microscopic study, 366
penetration, trifluorothymidine treatment of herpetic iritis in rabbits and, 532
pressure, effect of pilocarpine Ocusert with different release rates on, 491
temperature, environmental influences on, 596
tissues, teleost, resistance of, to oxygen toxicity, 858
Oculomotor control system, 164
defects in cerebellectomized monkeys, 618
Ocusert, effect of pilocarpine, with different release rates on ocular pressure, 491
Opacities, technique for testing visual function in presence of, 933
Optic-disk oxygen tension, in vivo measurement of, 927
nerve canal, is there a potential defect in blood-retinal barrier at choroidal level of, 513
Orbital tumors, extraocular, induced by human adenovirus type 12 in hamsters, 185
Organ culture of human retinal pigment epithelium and choroid: a model for study of cytologic behavior of RPE in vitro, 554
Outflow facility and its changeability under drugs, structural factors influencing, 280
Oxygen availability, inner-retinal, effects of arterial P_{CO_2} on, 449
consumption rate in monkeys, effect of arterial P_{CO_2} on inner-retinal, 456
tension in the anterior chambers of rabbits, effects of corneal environment on, 140
optic-disk, in vivo measurement of, 927
toxicity, resistance of teleost ocular tissues to, 858

P

Papilledema, incipient, in red-free light—a photographic study, comparison of congenital disc blurring and, 241
Paracentesis, release of PGE_2-like activity into aqueous humor after, and its prevention by aspirin, 939
Parasympathetic pathways to internal eye muscles, 193
Pars plana, electron microscopic localization of occluding junctions in primate ciliary process and, 863
Pemphigoid, benign mucous membrane, conjunctiva, chronic cicatrizing conjunctivitis, essential shrinkage of, 308
Perfusion, in vitro, functional and structural changes in the corneal endothelium during, 410
low-pressure, in primate eye, filtration coefficient of intraocular vasculature as measured by, 321

Permeability properties of ciliary epithelium in response to prostaglandins, 752
Phaco emulsification, trials and tribulations, 318
Photic damage to the retina, experimental and therapeutic aspects of, 35
maculopathy in rhesus monkey, a light and electron microscopic study, 17
Photocoagulation, argon laser, of ciliary processes and pigmented pupillary membrane in man, 622
preoperative, full-thickness eye wall resection, evaluation of, 262
Photoreceptors disturbed in orientation secondary to retinal detachment, realignment of, 849
PGE_2-like activity into aqueous humor after paracentesis and its prevention by aspirin, release of, 939
Phagolysosomal system of pigment epithelium: a key to retinal disease, 635
Pigment epithelium: a key to retinal disease, phagolysosomal system of, 635
Pilocarpine hydrolysis: clinical significance, 931
Ocusert, effect of, with different release rates on ocular pressure, 491
Platelet-induced vitreous membrane formation, 680
President's message, 473
Pressure, intraocular, control of intraocular blood flow, 327
influence of position on, 204
ocular, effect of pilocarpine Ocusert with different release rates on, 491
Primate ciliary process and pars plana, electron microscopic localization of occluding junctions in, 863
eye, filtration coefficient of intraocular vasculature as measured by low-pressure perfusion in, 321
Prostaglandins, 161
degeneration release of norepinephrine causes transient ocular hyperemia mediated by, 167
E, indomethacin blocks arachidonic acid-associated elevation of aqueous humor, 621
Prostaglandins—Cont'd
permeability properties of ciliary epithelium in response to, 752
synthesis, inhibition and intraocular pressure, 426
Protein, soluble, and glutathione, reversal of triparanol-induced cataract in rat, reduced sulfhydryl groups in, 389
of bovine cornea, 114
synthesis in ganglion cells of the rabbit retina after intravitreous injection of vinblastine, 467
Pupillary block glaucomas, suggested anatomic classification to define, 540
pigmented, membrane in man, argon laser photocoagulation of ciliary processes and, 622

R

Rabbit, activation of chloride transport by epinephrine and Db cyclic-AMP in the cornea of, 127
and ocular penetration, trifluorothymidine treatment of herpetic iritis in, 532
choroidal mast cells, density gradient of, 711
cornea, developing, quantitative determination of choline acetylase, acetylcholine, and acetylcholinesterase in the, 418
vaccinia-infected, a transmission electron microscopic study, 782
corneal allografts, immunologic protection of, preparation and in vitro testing of heterologous blocking antibody, 646
endothelium with calcium-free medium, studies on the cornea, reversibility of the effects of in vitro perfusion of, 98
effects of corneal environment on oxygen tension in the anterior chambers of, 140
of diphenylhydantoin on electroretinogram of, I. Effect of concentration, 567
II. Effects of hypoxia and potassium, 573
iris, hypochromia of, induced by 6-hydroxydopamine, 312
Rabbit—Cont'd
retina, effects of vinblastine on microtubule structure and axonal transport in ganglion cells, 579
protein synthesis in ganglion cells of, after intravitreous injection of vinblastine, 467
to low-intensity light, effects of prolonged exposure of, 45
Rats, galactosemic, galactitol accumulation and irreversible lens opacities in, 82
pigmented, urethan-induced retinopathy in, 65
retinoblastoma-like tumors induced in, by human adenovirus, 853
retinopathy in, simian virus 40-induced, 591
reversal of triparanol-induced cataracts in, amino acid content and uptake of $^{14}C\alpha$-AIB in cataractous and clearing lenses 386
reduced sulfhydryl groups in soluble protein and glutathione, 389
rods, directionality and waveguide properties of optically isolated, 873
Ratio, corneal and scleral distensibility, on enucleated human eyes, 145
Receptive fields, single-cell approach in visual system and study of, 794
Refraction using evoked brain potentials, rapid objective, 669
Resection, eye wall, full-thickness, evaluation of preoperative photocoagulation, 262
Resolution at low contrast with a fundus camera, comparison of various photographic films, 865
Retina, adult mouse, response of retinal ganglion cell axons to lesions in, 382
biologically fractionated, absolute levels of some free amino acids in normal and, 686
chick, indoleamine-containing cell in, 537
experimental and therapeutic aspects of photic damage to the, 35
foveal and parafoveal, directional sensitivity of, 497

Retina—Cont'd
implications of processing by the, is the brain behind the eye?, 398
in human eye, electron microscopic observation of gap at junction of ciliary epithelium with, 623
rabbit, effects of vinblastine on microtubule structure and axonal transport in ganglion cells of, 579
protein synthesis in ganglion cells of, after intravitreous injection of vinblastine, 467
to low-intensity light, effects of prolonged exposure of, 45
Retinal blood flow, relative, in monkeys, effect of arterial P_{CO_2} on, 335
degeneration in cat, cone and rod responses in nutritionally induced, 694
disease, phagolysosomal system of pigment epithelium: a key to, 635
detachment, realignment of photoreceptors disturbed in orientation secondary to, 849
ganglion cell axons, response of, to cell axons to lesions in adult mouse retina, 382
pigment epithelium, human, and choroid: a model for the study of cytologic behavior of RPE in vitro, organ culture of, 554
tissue culture of, 52
epithelia, intracellular junctional complexes of, 354
transient layer of Chievitz, fine structure of, 504
vessels, human, fluorophotometric recording of fluorescein dilution curves in, 310
Retinitis, foveomacular, an important problem in military medicine, epidemiology, 5
Retinoblastoma-like tumors induced in rats by human adenovirus, 853
Retinopathy in rat, simian virus 40-induced, 591
urethan-induced, in pigmented rats, 65
Rhodospin, bleached, evidence for the involvement of a reduced flavin isomerization catalyst in the regeneration of, 234
Rod and cone responses in nutritionally induced retinal degeneration in cat, 694
rat, directionality and waveguide properties of optically isolated, 873
RPE, cytologic behavior of, in vitro, organ culture of human retinal pigment epithelium and choroid: a model for study of, 554

S

Saccadic inhibition induced by brain-stem stimulation in the alert monkey, 77
Schiøtz tonograms, advanced method of information processing for clinical, 834
Serum antiproteases, α_1-antitrypsin, corneal ulceration and, 759
Sickling, macular ischemia and infarction in, 633
Simian virus 40-induced retinopathy in rat, 591
Single-cell approach in visual system and study of receptive fields, 794
Sodium fluorescein dye angiography of eye, injection technique for indocyanine green and, 881
substitutes, influence of, on cation composition of intracellular fluid, studies on crystalline lens, 485
Stereo field map with implications for disparity processing, 904
Stimulus, visually evoked cortical responses of amblyopes to spatially alternating, 936
Strabismus-beyond the cover test, 719
Sulfhydryl groups, reduced, in soluble protein and glutathione, reversal of triparanol-induced cataract in rat, 389
Surgery, vitreous, recent advances in, 549
Sympathectomy, chemical, control of intraocular blood flow, effect of, 848
Sympathetic tone, effects of, control of intraocular blood flow, 332

T

Teleost ocular tissues, resistance of, to oxygen toxicity, 858
Temperature, ocular, environmental influences on, 596
Tension, optic-disk oxygen, in vivo measurement of, 927
oxygen, in anterior chambers of rabbits, effects of corneal environment on, 140
Tetrahydrotriamcinolone, an in vitro evaluation of, 856
Theophylline associated with primary open-angle glaucoma, increased sensitivity to, 603
Tissue culture of human retinal pigment epithelium, 52
Tissues, teleost ocular, resistance of, to oxygen toxicity, 858
Tonograms, Schiøtz, advanced method of information processing for clinical, 834
Toxicity, oxygen, resistance of teleost ocular tissues to, 858
Trabeculotomy, laser, in monkeys, 707
Transplantation, corneal, 85
sensitization to human lymphocyte antigens by, 639
Transport, axonal, in ganglion cells of rabbit retina, effects of vinblastine on microtubule structure and, 579
Trifluorothymidine treatment of herpetic iritis in rabbits and ocular penetration, 532
Triparanol-induced cataract in rat, reversal of, reduced sulfhydryl groups in soluble protein and glutathione, 389
reversal of, in rat, amino acid content and uptake of $^{14}C\alpha$-AIB in cataractous and clearing lenses, 386
Tritanopia, congenital, without neuroretinal disease, 608
Tumors, orbital, extraocular, induced by human adenovirus type 12 in hamsters, 185

Tumors—Cont'd
retinoblastoma-like, induced in rats by human adenovirus, 853

U

Urethan-induced retinopathy in pigmented rats, 65

V

V pattern exotropia, electromyographic study of an unusual case, 232
Vaccinia-infected rabbit cornea: a transmission electron study, 782
viruses in corneal cell cultures with immunoperoxidase, light and electron microscopic study, identification of herpes simplex and, 839
Vascular perfusion pressure gradients in the eye, 198
VER in the central field of an amblyopic subject, lateral inhibition and, 154
Vertebrates, comparative study of fine structure of retinal Müller cells in various, 434
Vessels, human retinal, fluorophotometric recording of fluorescein dilution curves in, 310
Vinblastine, effects of, on microtubule structure and axonal transport in ganglion cells of rabbit retina, 579
Vinblastine, protein synthesis in ganglion cells of rabbit retina after intravitreous injection of, 467
Viruses, vaccinia, in corneal cell cultures with immunoperoxidase, light and electron microscopic study, identification of herpes simplex and, 839
Vision, degradation of, through a simulated cataract, 213
Fourier analysis of, 86
Visual connection, enter nucleus suprachiasmaticus, 237
excitation, 239
function in presence of opacities, technique for testing, 933
system and study of receptive fields, single-cell approach in, 794
histological studies of, in monkeys with experimental amblyopia, 727
Vitelliform macular lesion, typical, normal electrooculogram in patient with, 830
Vitreous implantation, optical properties of gels designed for, 465
membrane formation, platelet-induced, 680
surgery, recent advances in, 549

W

Waveguide properties of optically isolated rat rods, directionality and, 873
